

# PIYUSH GUPTA

## Data science Enthusiast

piyushguptaa741@gmail.com ☎ 9873027634

📍 New Delhi, India

📝 My blogs

in My linkedin

📁 My Github

## SKILLS

C++, Python, Machine learning, Deep learning, Natural Language Processing, Data Science, Tensorflow, Keras, Computer Vision, Java, HTML, Matlab, Arduino.

## INTERNSHIPS/TRAINING

### Machine Learning Intern

#### MindMapperz

📅 June 2019-August 2019 📍 New Delhi,India

- Worked On NLP based projects Automatic Grading and Automatic Question generation, and also on their practical implementation.
- [Project Link](#)

## EXPERIENCE

### Technical Executive

#### BVPISTE

📅 October 2017 – July 2018 📍 New Delhi,India

- Worked with the team in holding various workshops based on Robotics, Python.
- Event Manager of LFR2.0 at BVEST annual techfest of BVCOE.

### Research And Development Head

#### BVPIEEE CS

📅 August 2018–August 2019 📍 New Delhi,India

- Under BVPIEEE CS Chapter delivered workshops on machine learning, data science and Python.

### Vice Chairman

#### BVPIEEE CS

📅 August 2019–Present 📍 New Delhi,India

- Mentoring students working under the field of AI and learning skills of management and leadership.

## EDUCATION

### Bachelor of Technology

#### Bharti Vidyapeeth's College Of Engineering

📅 2017-2021 📍 Paschim Vihar, New Delhi

## HONORS & AWARDS

- 1st runners up at the Amity Cyber Cup hackathon.
- 1st runners up HackOver at BVP organised by BVPCSI.
- 1st runners up IGDTUW Mini Hackathon
- Top 10 out of 600 at Pune Smart City Hackathon
- Winner Lightning Talk At the Innovicon'19 held by BVPIEEE.
- Winner at Game Oasis Hackathon San Francisco, USA

## PROJECTS

### Signature Recognition

- An AI based Model to detect forgery of a person's signature.
- The classification was done on the basis of two models CNNs and KNNs based on some hand-picked features.
- [Project Link](#).

### Autism Care

- A web-based Application to detect autism in infants based on pupil movements.
- The classification was done by a CNN model by generating the scan paths based on the pupil tracking and then feeding the generated path into the Model.
- [Project Link](#).

### Real Time Image Classifier

- A real-time Android app based image classifier. The project was a great learning curve, as I made my own data set and coded the whole model from scratch.
- [Project Link](#)

### Automatic Grading System

- An AI based model to automate the process of grading/checking subjective answers.
- [Project Link](#)

### CricView

- An IOT Based project with the integration of an Android app. To give user a spectator view and experience of a cricket match back at his/her home by monitoring the controls of the cameras at stadium from the mobile phones of the user through the app.
- [Project Link](#)

### Lyrics Generator

- Developed an LSTM based model to generate new and meaningful Hindi lyrics everytime.
- The model was trained on various Hindi songs lyrics and then predicted new and random lyrics.
